  cartEmpty.hidden = cart.length > 0;
  cartList.innerHTML = cart.map((item, i) => `
    <li class="mini-item">
      <span class="mini-name">${item.name}</span>
      <span>$${item.price.toLocaleString('en-US')}</span>
      <button type="button" class="btn btn-sm btn-outline-danger" data-
index="${i}">Remove</button>
    </li>`).join('');
  const total = cart.reduce((sum, item) => sum + item.price, 0);
  cartTotal.textContent = '$' + total.toLocaleString('en-US');
  updateButtons();
}
```

```
// Add to Cart
addButtons.forEach(button => {
  button.addEventListener('click', () => {
    const product = readCard(button);
    if (countOf(product.name) >= MAX_PER_PRODUCT) return;
    cart.push(product);
    render();
  });
});

// Remove (one listener on the list handles every Remove button)
cartList.addEventListener('click', event => {
  const removeBtn = event.target.closest('button[data-index]');
  if (!removeBtn) return;
  cart.splice(Number(removeBtn.dataset.index), 1);
  render();
});

// cart icon opens / closes the mini cart (the link still goes to checkout.html
if JavaScript is off)
cartBtn.addEventListener('click', event => {
  event.preventDefault();
  miniCart.hidden = !miniCart.hidden;
});

render();

# Midterm – Upgrade Your E-commerce Navigation, Checkout and Cart

**Name:** [Your name]
**Roll number:** FA24-BCS-095

| Value | Calculation | Result |
|---|---|---|
```

```
| N | last two digits of the roll number | **95** |
| BP | 600 + N | **695px** |
| H | (N x 7) mod 360 | **305** -> `hsl(305, 70%, 45%)` |
| K | (N mod 3) + 3 | **5** columns |
| Cart limit | (N mod 4) + 2 | **5** per product |
| Delivery date range | exam date to exam date + N days | **29 Oct 2026** to **01 Feb 2027** |

## Files changed
| File | Change |
|---|---|
| `index.html` | Task 1 mega-menu + hamburger, cart icon now links to checkout and has a badge + mini-cart panel, `script.js` linked; the stray `//` text comments turned into real HTML comments |
| `product.html` | Task 1 mega-menu + hamburger, cart icon links to `checkout.html` |
| `checkout.html` | **New** – Task 2 |
| `css/style.css` | Added MIDTERM section (variables, Task 1, Task 2, Task 3 styles) at the end |
| `script.js` | **New** – Task 3 |

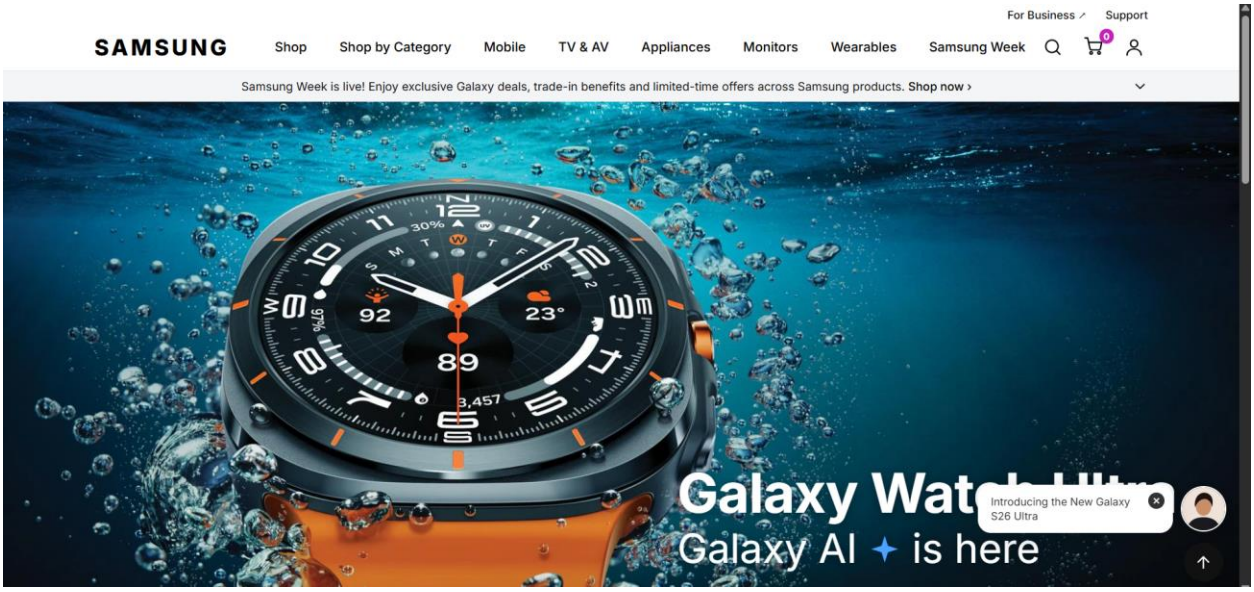

## Task 1 - Mega-menu
- Added a "Shop by Category" item to the navbar. From 695px up, hovering it or tabbing to it (`:focus-within`) opens a full-width panel with 5 columns (heading + 4 links each). The panel is `position: absolute` under the header, so it does not push content down, and the header has `z-index: 1040` so it sits above the cards, the chat widget and everything else. An invisible `::before` bridge keeps it open while the pointer moves into it.
- Below 695px the links hide behind a CSS-only hamburger (hidden checkbox + `:checked`) and the same 5 groups become `<details>`/`<summary>` accordions, closed by default, each opening independently.
- No JavaScript is used.

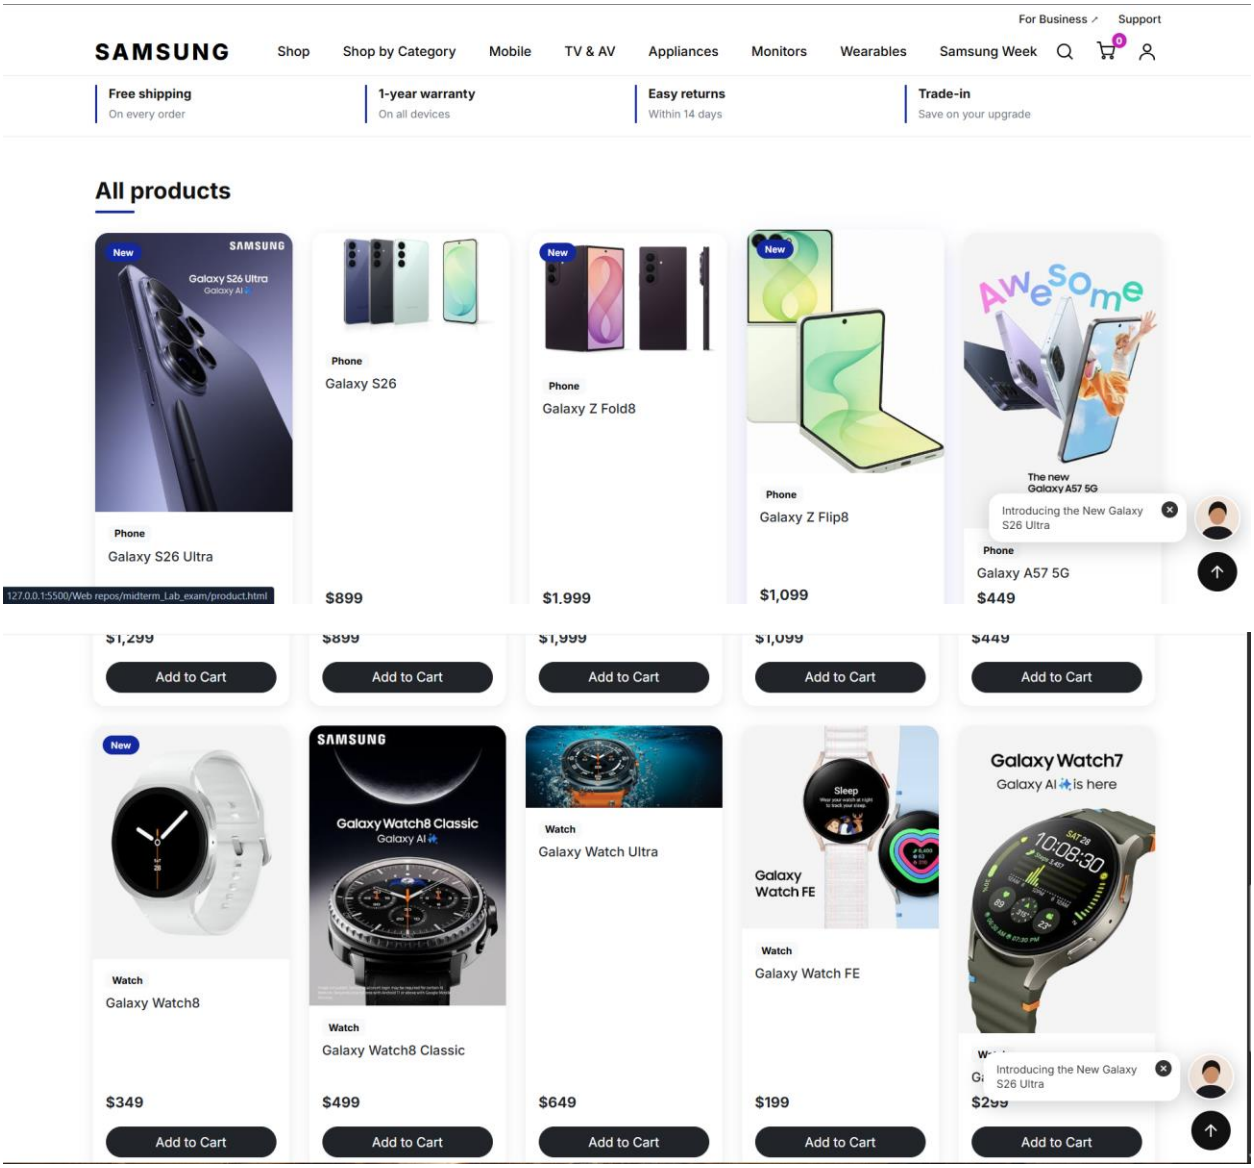

## Task 2 - Checkout form
- `checkout.html` (linked from the cart icon) has two fieldsets with legends, every input has a label joined with `for`/`id`.
- Validation is HTML5 only: `required`, `type="email"`, `minlength`, `pattern="03[0-9]{2}-[0-9]{7}"` for the phone, and `min`/`max` on the date.
- Errors use `:user-invalid`, so the red border and message appear only after the user interacts.
- From 695px the fieldsets sit side by side (CSS Grid) with labels in a left column; below that it is one column. The submit button is `w-100` at every size.
```

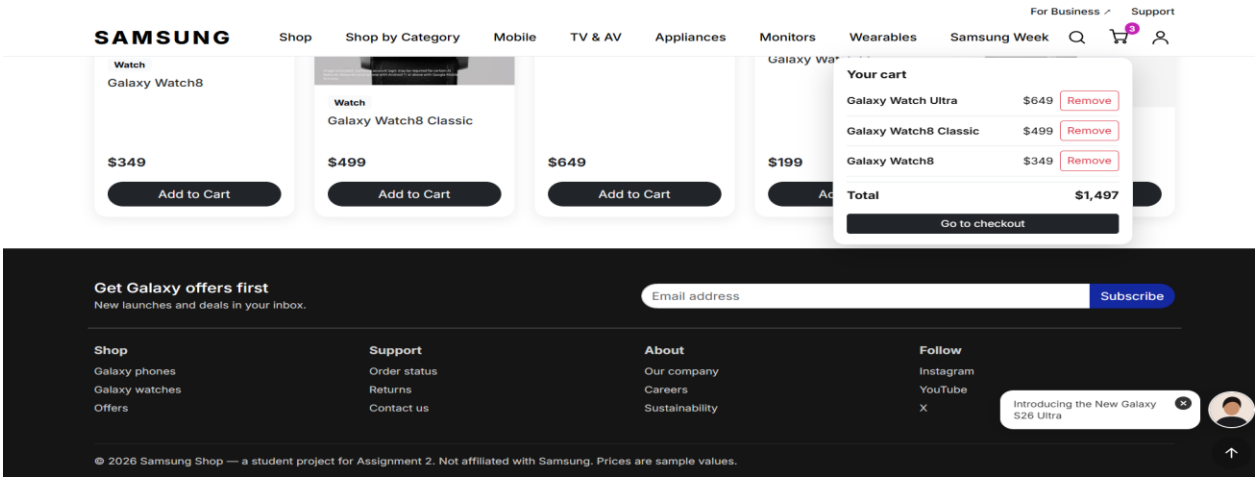

```
## Task 3 - Cart
- `script.js` adds the product (name and price read from the card) to an array on "Add to Cart" and shows the count in the cart badge.
- Clicking the cart icon toggles a mini cart with a Remove button for every item and a total made with `reduce()`.
- Each product can be added 5 times; then its button becomes "Limit reached" and is disabled until one is removed.
